

# Armitage Leather Tub Stitching Guide

This sheet is designed to be printed off at A4.

It is meant as a guide only, the precision of this chart may differ with different materials and irons.

It is to help give you an idea of the increasing distances your stitching will sit at when stitching round items.

The idea was to produce it as a visual guide for the video, but as some may find it handy to print off and have in the workshop, I thought I would make it available.

Enjoy.

Nigel
